

Ground-Mounted Solar Facility Visit

Delegate Briefing

Purpose of the visit

This briefing provides essential information for delegates attending the **tour of the Bullion Fields ground-mounted solar facility on the afternoon of Friday 9th October 2026**.

The visit will provide an opportunity to see the solar installation and help understand how the facility operates. For safety reasons, delegates must remain with the designated guide and follow all site instructions throughout the visit.

Arrival and departure

- Delegates will **arrive and depart by coach**.
- Please remain with the group when leaving the coach and follow the guide's instructions.
- At the end of the tour, delegates will return to the coach as directed by the guide.
- Please do not leave the designated tour area or explore the site independently.

Site conditions

The facility is an operational outdoor site and conditions may be different from those encountered on a normal visitor attraction.

Please be prepared for:

- **Uneven or rough ground**, including grass, gravel and potentially muddy areas.
- **Wet or slippery conditions**, particularly if it has been raining.
- Changing weather conditions and exposure to wind and rain.
- Standing and or walking for approximately **30 - 40 minutes**.

What to wear

Please wear:

- Sturdy, comfortable footwear with good grip.
- Weather-appropriate outdoor clothing.
- Waterproof clothing if rain is forecast.
- Clothing suitable for potentially muddy or wet ground.

If you have any mobility requirements or concerns about walking on uneven ground, please inform the organisers before the visit.

Safety during the tour

For everyone's safety:

- **Stay with the guides and the group at all times.**
- Follow all instructions given by the guides or site personnel.
- Remain within designated areas and on the instructed route.
- **Do not touch, climb on or interfere with any solar panels, electrical equipment, fencing, cables, structures or other site equipment.**
- Do not enter restricted or fenced-off areas.
- Take care when walking over uneven, wet or muddy ground.
- Be aware of other any other vehicles or site activity and follow instructions regarding their movement.
- Keep a safe distance from equipment and infrastructure.

Important

A solar facility contains **electrical equipment and other operational infrastructure**. Some equipment may not appear hazardous but must not be approached or handled.

The site remains an operational facility during the visit. The tour is therefore a **guided visit rather than an opportunity for independent exploration**.

In case of poor weather

The tour may continue in wet weather, subject to the site operator's assessment of conditions.

Please come prepared for rain. If weather or ground conditions become unsuitable or unsafe, the guide will provide instructions and may alter the route or curtail the visit.

Before leaving the coach

Please ensure that you have:

- Appropriate footwear and outdoor clothing.
- Any personal medication or essential items you require.
- Your personal belongings secured.
- Listened to the guide's safety instructions before proceeding.

Thank you for following the site rules and the guide's instructions. Your cooperation will help ensure that everyone can enjoy a safe and informative visit.
